Required Materials:

The Analysis and Use of Financial Statements, Third Edition Publisher: Wiley;
Gerald I. White, Ashwinpaul C. Sondhi, Dov Fried, ISBN 0-471-37594-2; ©2003
Please bring the textbook and a copy of [Pfizer financials](#) (pages 39 to 62) to the class every day.

Wharton Service: <http://wrdsx.wharton.upenn.edu/> [a516su09; _____]

The recent corporate accountability crises has focused the world's attention on what accounting reports can do and what it can not do. Accounting failures at AIG, Enron, WorldCom and numerous other firms has led to extensive reforms in the US. The Sarbanes-Oxley (2002) act includes many accounting and disclosure reforms. But these actions could not prevent the options backdating scandals of 2006-07 or fair value crisis relating the lending crisis of 2008. Throughout these crises what was surprising was the lack of understanding of GAAP and financial statements by many Board of Directors and Wall Street Analysts. Through this course you will gain a better understanding of some of the issues relating to analyzing financial statements. If one thinks of financial reporting as a game - the executives will try to put the firm in the best light under what GAAP allows, how could you as an analyst disentangle the information.

This course will emphasize the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Within each decision context, models of valuation and the current state of understanding of empirical research in accounting and finance will be analyzed. Accounting is the "language of business" and with the knowledge gained from this course, you will be able to read, interpret and critically evaluate the published financial disclosures that firms make. You will gain insights into the intense controversies surrounding the promulgation of disclosure standards and you will better understand how you may influence and be influenced by this essentially political process. If you are interested in careers in investment banking, equity research, private equity, risk analysis and in pursuing the CFA designation, this course is a must.

The second major theme of the course is how capital markets react to accounting disclosures. What is (and will be) the value impact of earnings, book value and other accounting information? We will consider the traditional models and also newer insights into the pricing of securities using free cash flows and economic value added. If somebody showed the statements of a firm to you, you should be able to see the "inside" story, ask the right questions and value the firm. The dominant approach in this course will be fundamental analysis. Finally we will survey the empirical results from the capital markets research. Bankruptcy and risk prediction models and bond rating models that use accounting numbers will be evaluated. We will look at studies that try to explain variations in the P/E ratios and price to book ratios and earnings response coefficients. Studies that document market anomalies based on accounting numbers will be discussed last.

The standard prerequisites for this course are two courses in financial accounting (for example Accounting 500 and 502). If you have taken only Accounting 500, you may still take this course, if you are willing to put in some extra effort. Please fill the **Prerequisite exemption form**:

<http://accounting.cba.uic.edu/Classes/Prerequisite-Exemption-Form.htm> and bring it to the class to get my approval. The course uses real financial statements extensively and you should be familiar with annual reports. As a part of the course you will be analyzing and valuing one company (a company of your choice) thoroughly. For this, you may have to download 10-Ks and other SEC filings from 'Disclosure' etc.. [First class](#)

Course Requirements

In Groups: Cases (three) 12%; Current Developments (three) 6%; Financial Statements project: 10%
Individual: Midterm Examination: 28%; Final Examination: 36%; Quiz (Four Best) : 8%

Pfizer 2003 (with Pharmacia acquisition) • Pfizer 2007

Notes

01 **Introduction:** Notes

03 **Cash Flow Notes Analysis:** Notes • 03-Lucent-1999-10K-Valuation (1 page) • Lucent-1999 Financials • Lucent-1999 Fill 10-K • Lucent-2000 Financials • Lucent-2000-CF • Ford 2003 • Ford 2004

04 **Ratios and Analysis:** Notes • NASDAQ • Financial Analysis of Pfizer • Financial Analysis of Pfizer with stock buyback • Dell 04 10K • Dell 05 10K

06 **Inventory** Notes • IRS Rules • IRS Court cases • Form 970
• <http://www.exxonmobil.com/corporate/> Find XOM LIFO reserves • ExxonMobil-10K-2004

07 **Long lived assets** I: Notes • Long lived assets book example • Long lived assets revised example • Weyerhaeuser • AOL-Time Warner 2002 • Calpine • Napoleon • Lucent 1999 10K

08 **Long lived Assets** II • Estimation notes 1 • Estimation notes 2

09 **Income taxes:** Notes • Tax analysis for Pfizer • GE statements • Amazon 2002 Statement • Amazon 2001 FS • Amazon Taxes

11 **Financing liabilities; Leases and incentives; Off-balance sheet activities:** Notes • Look at lease disclosures in: Sears 1999 • J C Penney 1999 • 11-19 to 22 Sears

13 **Intercorporate Investments:** Notes • Investments Example Part 1 • Part 2 • With or without ice • Analysis • Book example • Chubb group analysis (from book) • CNA 2005

Enron: Notes •

18 **Risk and Debt analysis:** Notes

05 **Equity Analysis:** Notes • Bernard & Thomas • B&T-Fillin • PPT
• Campbell Reports First Quarter Results (front Company)
• Campbell Soup First-Quarter Profit Climbs 31 Percent on Tax Benefit (from AP)
• SanDisk Shares Drop on Intel-Micron Deal

Nike 06 Announcement • Nike Profit Falls; Marketing Costs, Options Are Cited • Nike Statements • Nike market reaction

Project

The project has two segments - oral **presentation** and a written **report**. There are two types of topics you can choose from. You can choose a company (or a few companies in an industry) or choose a general topic (e.g. Can merger success be predicted with financial statements?). Your team (up to 4 members) must decide on a topic and tell me by the 3rd class. When you tell me your topic, you must also give me a copy (or send an email copy) of the company's annual report and or the 10-Ks to me. After that, your team must schedule a meeting with me to talk about the issues you will be analyzing. Try to search the financial press (first pass: Fortune, Forbes, Business Week, Wall Street Journal and New York Times) for articles about the firm and email me. When you come to the meeting with me, please bring the basic financial statements, and any articles. At the meeting, we will come up with a set of customized issues and topics that you should focus in your presentation. Some topics are (Note that this list is not comprehensive and you need not include every item on the list)

- 1 ✕ Company Profile; Financial Information and Snapshots of the company
- 2 ✕ Financial Statements; Common size and summary statements;
- 3 ✕ Accounting methods (liberal or conservative); Off balance sheet items; Related party transactions
- 4 ✕ Growth or lack thereof; How did the company finance growth - analyze CFI, CFO and CFF
- 5 ✕ Ratios and comparison with industry (top market caps) and competitors
- 6 ✕ Stock overview, quotes, charts from last few years)
- 7 ✕ Risk; Debt and bond ratings; Bankruptcy probability; z-score
- 8 ✕ Key Developments; News from the financial press; Press Releases; Lawsuits; Political and social criticisms
- 9 ✕ Market Sentiment; Performance; Shares Shorted; Insider Trading; Institutional Holders
- 10 ✕ Corporate governance issues; executive turnover
- 11 ✕ Professional Analysis; Earnings Estimates; Your recommendations

Depending on the most interesting issues that arise out of your company choice, I will schedule your group presentation in classes 6 to 15. For example, if debt and borrowing issues are the most important factor for your company, you will be scheduled for presentation in the 7th class. You also need to do a general company written report incorporating all the topics raised in the course. Guidelines are given below and the written report it is due in the last week of the term.

Choosing companies: Choose a company or industry that you may be interested for a career. Please do not choose foreign or financial or real estate firms. Some of the companies that are interesting and the ones that I can help are Chicago companies including Walgreen's, UAL, Sears, McDonalds and Abbott. Other perennial favorites include Gap, AMR, Cisco, Merck, Target, Time-Warner AOL, Maytag, GE and Wal-Mart. You can learn a lot about US capital markets by analyzing the financial statements of these firms.

Presentation guidelines

You must email me the presentation at least 3 hours before class so that I can download it to the classroom. In the class, before the presentation, give a copy of the slides to me. Please restrict yourselves to 10 -15 slides - 10 minutes. Do not show tons of financial ratios and information. Assume that the listener is well informed and make sure that they learn something new and interesting from your presentation. Do not read from a written narrative - you can look at your notes occasionally. You must look at the screen or the class and talk. I will give you a slide clicker and so when you talk you need not be near the computer in the corner. L

✕ Click for **Report guidelines List**
