## Chairman's Message...

I am pleased to announce the 4th Annual **Illinois Eye Review** on March 19-25, 2011. To date, over 700 residents, fellows and practicing ophthalmologists have attended the program, which offers comprehensive coverage of ophthalmology facts, case presentations, and in-depth discussion of advanced concepts. In 2010 the Illinois Eye Review offered over **79 hours of CME** credit. Evaluations of the program have been enthusiastic. "**Great review and development of concepts with constant question-asking, problem-solving and explaining 'old' concepts in new ways,**" wrote one participant.

The Illinois Eye Review offers a new approach to ophthalmology review and continuing education by adapting Kolb's experiential learning model to our curriculum. The course is organized into six days of factual review (Saturday March 19 through Thursday, March 25). On these days participants will be introduced to the fundamentals of ophthalmology and be provided opportunities to review and conceptualize them through case discussions. The last day of the course, Friday March 25, offers a variety of topical lectures that will provide opportunity to apply what participants have learned to real-world clinical problems, presented by course faculty. Our approach allows course participants to review facts, test and expand their knowledge through conceptualization, and build on their understanding by active experimentation with specific clinical applications.

The Illinois Eye Review offers participants the opportunity to immerse themselves **in the basics of ophthalmology** under the tutelage of Illinois Eye and Ear Infirmary physicians, known worldwide for their management of difficult and complicated cases in all major ophthalmologic subspecialties. Equally important, the program offers the opportunity to **discuss cases and learn about important new developments and current concepts** from experts known for their outstanding ability to teach. As you review lists of the Program Faculty you will recognize the names of numerous leaders in ophthalmology.

We launched the Illinois Eye Review 3 years ago in celebration of the 150th Anniversary of the Illinois Eye and Ear Infirmary, as the best way to honor and also build upon an outstanding tradition of excellence and innovation. This success of our inaugural program has encouraged us to invest in even greater innovation in program design and to offer a **learning opportunity unlike any other in ophthalmology**. Please join us on the University of Illinois at Chicago campus on March 19th through the 25th, 2011. I look forward to meeting you.

**Dimitri Azar, MD**

Program Director  
BA Field Endowed Chair of Ophthalmologic Research  
Professor and Department Head  
University of Illinois Eye & Ear Infirmary

**DAVID ABRAMSON, MD** | [Memorial Sloan-Kettering Cancer Center](#) Chief of the Ophthalmic Oncology Service

Dr. Abramson is the first Chief of the Ophthalmic Oncology Service at Memorial Sloan-Kettering Cancer Center in New York City where he has appointments in Surgery, Pediatrics, and Radiation Oncology. He is also Professor of Ophthalmology at Weill-Cornell Medical School and New York Presbyterian Hospital. Dr Abramson completed both a residency and fellowship in ophthalmology at Columbia Presbyterian Medical Center. He has published almost 500 scientific articles, received the Weisenfeld Award from ARVO and the Senior Honor Award from the AAO. He is recognized as the world's leading authority on retinoblastoma and was a member of the Executive Committee of the NIH sponsored Collaborative Ocular Melanoma Study.

**DONALD J. D'AMICO, MD** | [Weill Cornell Medical College](#) Professor and Chairman of Ophthalmology

Dr D'Amico, Professor and Chairman of Ophthalmology at Weill Cornell Medical College and Ophthalmologist-in-Chief at New York Presbyterian Hospital, is an internationally recognized leader in the field of vitreoretinal surgery and a highly respected educator. A graduate of the Massachusetts Institute of Technology and the University of Illinois College Of Medicine, he completed his residency at the Massachusetts Eye and Ear Infirmary. Dr. D'Amico has published more than 175 articles on vitreoretinal diseases and has co-edited two books covering comprehensive retinal themes. Dr. D'Amico is the recipient of many honors, including the Honor Award and the Senior Achievement Award from the American Academy of Ophthalmology.

**ROBERT FOLBERG, MD** | [Oakland University William Beaumont School of Medicine](#) Dean and Chief Academic Officer

Dr. Folberg is Dean of the Oakland University William Beaumont School of Medicine, Professor of Biomedical Sciences, Pathology and Ophthalmology, and Chief Academic Officer of Beaumont Hospitals. Dr. Folberg received his MD from Temple University College of Medicine in 1975. A respected ocular pathologist and innovator in medical education, he currently teaches eye pathology to Beaumont Hospitals' ophthalmology residents, a distance education program that he conducts using a CD-ROM based curriculum, Web-based instructional tools including virtual microscopy, and biweekly interactive videoconferencing. His distance education program also provides instruction to seven other university medical centers in the United States and support to two institutions abroad.

**DAVID GUYTON, MD** | [Wilmer Eye Institute at Johns Hopkins](#) Professor and Director of Pediatric Ophthalmology and Adult Strabismus

Dr. Guyton is currently the Director of Pediatric Ophthalmology and Adult Strabismus and serves as the Zanyvl Krieger Professor of Ophthalmology and Director of the Zanyvl Krieger Children's Eye Center at Johns Hopkins. Graduating from Harvard Medical School in 1969, Dr. Guyton subsequently completed his residency in ophthalmology at the Wilmer Eye Institute at Johns Hopkins in 1976. Dr. Guyton received the prestigious Mildred Weisenfeld Award from ARVO in May 2007, as well as the Alcon Research Institute Award, an RPB Senior Scientific Investigator Award, and the RPB Disney Award for Amblyopia Research.

**CRAIG MCKEOWN, MD** | [Bascom Palmer Eye Institute](#) Professor of Clinical Ophthalmology

Dr. McKeown is Associate Professor of Clinical Ophthalmology specializing in Pediatric Ophthalmology and Adult Strabismus. He earned a BS and MD from Northwestern University and completed a residency in ophthalmology at Walter Reed Army Medical Center. He also completed fellowships in Pediatric Ophthalmology and Strabismus at Children's Hospital National Medical Center, George Washington School of Medicine, and in Pediatric Ophthalmology and Ophthalmic Genetics at Wilmer Eye Institute, Johns Hopkins University School of Medicine. Dr. McKeown conducts research on pediatric disorders of the eye and has published widely on this subject. He has been the recipient of numerous academic and military awards/honors.

**NANCY NEWMAN, MD** | [Emory University](#) Leo Delle Jolley Professor of Ophthalmology, Director of Neuro-Ophthalmology

Dr. Newman is the Leo Delle Jolley Professor of Ophthalmology, Professor of Ophthalmology and Neurology and Instructor in Neurological Surgery at the Emory University School of Medicine, where she serves as the Director of Neuro-Ophthalmology. She also holds the academic position of Lecturer in Ophthalmology at the Harvard Medical School. She attended Princeton University, the University of London on a Marshall Scholarship, and Harvard Medical School. Dr. Newman is a Fellow of the American Academy of Neurology and of the North American Neuro-Ophthalmology Society. She has over 250 publications, including scientific articles, book chapters, and books, including the primary textbook in neuro-ophthalmology, Walsh & Hoyt's Clinical Neuro-Ophthalmology, 5th and 6th Editions.

**JOSEPH RIZZO, MD** | [Harvard Medical School](#) Associate Professor of Ophthalmology, Director of Neuro-Ophthalmology

Dr. Rizzo is an Associate Professor of Ophthalmology at Harvard Medical School and the Massachusetts Eye and Ear Infirmary and the Director of the Neuro-Ophthalmology service at the Infirmary. He founded the Boston Retinal Implant Project in the late 1980s, and he has since served as Co-Director of the Boston Retinal Implant Project and as Director of the Center for Innovative Visual Rehabilitation at the Boston VA. He earned his medical degree from Louisiana State University and completed a Neurology residency at Tufts New England Medical Center and an Ophthalmology residency at Boston University Hospital. Dr. Rizzo then completed a fellowship at the Massachusetts Eye and Ear Infirmary in neuro-ophthalmology.

**HERMANN D. SCHUBERT, MD** | [Columbia University](#) Professor of Clinical Ophthalmology and Pathology

Dr. Schubert is Professor of Clinical Ophthalmology and Pathology at Columbia University and Director of Ophthalmic Pathology at Presbyterian Hospital in New York. He received his MD from Heinrich Heine University in Dusseldorf Germany and completed residencies in pathology and in ophthalmology at Columbia Presbyterian Hospital in New York. He is the Director of the Ocular Anatomy Section for the annual Lancaster Course, Director of the Ocular Pathology Section for the Greater NY Clinical Science Course, and he has been a member of the Wills Eye review course since 1990. Dr. Schubert is the author, co-author and editor of many publications, book chapters and one book.

**MORTON E. SMITH, MD** | [Washington University](#) Professor Emeritus, Associate Dean Emeritus and Course Master in Ophthalmology

Dr. Smith is currently Professor Emeritus, Associate Dean Emeritus and Course Master in ophthalmology for Washington University medical students and is consultant in ophthalmic pathology. Dr. Smith, the recipient of numerous teaching awards, received his B.S. and M.D. from the University of Maryland. After internship in Denver, Colorado, he started his ophthalmology residency at Washington University in St. Louis. Following fellowships in pathology, ophthalmic pathology, and ocular oncology, he was appointed to the faculty at Washington University in 1966, where he has remained to the present, rising to Professor and Associate Dean. He has written over 75 peer reviewed articles plus chapters for several textbooks.

**JAMES TSAI, MD\*\*** | [Yale University School of Medicine](#) Robert R. Young Professor and Chair of Ophthalmology and Visual Science

Dr. Tsai was appointed the Robert R. Young Professor of Ophthalmology and Visual Science at Yale University in 2006. He serves as Chair of the Department of Ophthalmology and Visual Science at Yale Medical School and Chief of the Ophthalmology Service at Yale-New Haven Hospital. Dr. Tsai completed his residency in ophthalmology at the Doheny Eye Institute at USC in Los Angeles. Following his residency, Dr. Tsai completed glaucoma fellowships at the Bascom Palmer Eye Institute at the University of Miami and at Moorfields Eye Hospital and the Institute of Ophthalmology in London. He has authored a wide range of scientific articles and book chapters in glaucoma, as well as the medical textbook. Medical Management of Glaucoma. He has received an Achievement Award from the AAO.

**KENNETH WRIGHT, MD** | [University of Southern California](#) Director of Pediatric Ophthalmology Research and Education

Dr. Wright is Director of Pediatric Ophthalmology Research and Education at Cedars-Sinai Medical Center in Los Angeles and Clinical Professor of Ophthalmology at the USC Keck School of Medicine. He spent three years as Director of Pediatric Ophthalmology at the Cleveland Clinic. Prior to the Cleveland Clinic, he was a full-time faculty member at USC School of Medicine and Children's Hospital of Los Angeles. Dr. Wright is devoted to the welfare of children and the health of their eyes. He is an internationally respected ophthalmologist and educator. He has authored over 80 scientific papers and 7 textbooks on ophthalmology and eye surgery including the recently published second edition of the renowned thousand page textbook, Pediatric Ophthalmology and Strabismus.

**FRED A. ZAR, MD, FACP** | [University of Illinois at Chicago](#) Professor of Clinical Medicine and Firm Chief

Dr. Zar is Professor of Clinical Medicine and Chief of the Inpatient Medicine Service at the University of Illinois Medical Center. He has been an infectious disease consultant for 27 years and is in his 24th year as an Internal Medicine Residency Program Director. In addition, he is the Course Director of the M2 Clinical Pathophysiology Course at the University of Illinois College of Medicine at Chicago. His research interests include HIV therapy, C. difficile diarrhea and medical education. He has been the recipient of the Clifford Pilz Teaching Attending of the Year Award from the internal medicine residents eight times, and has received 10 Golden Apples from the University of Illinois medical students.

\*\*Dr. Tsai will limit his lecture to current concepts in Glaucoma.

1.45pm-2.30pm	Complications of Cataract Surgery	E. TU	5.10pm-5.30pm Medical Therapy of Glaucoma	J. WILENSKY
2.30pm-3.15pm	Tonometry, Aqueous Dynamics & Optic Nerve Examination	T. VAJARANANT	5.30pm-6.00pm Glaucoma Surgery and Complications	E.SUNG
3.15pm-3.35pm	Perimetry in Glaucoma Patients	J. WILENSKY	6.00pm-6.30pm Glaucoma Clinical Trials	J. WILENSKY

7.30am-10.30am	<b>F. ZAR General Medicine:Update</b> Ophthalmic manifestations of the major systemic diseases including HIV, Hypertension and Diabetes will be described. Antiviral, antifungal and antibacterial agents and their benefits will be reviewed. Current concepts about malignancies with ophthalmic manifestations will be reviewed.	<b>R. FOLBERG Ocular Pathology</b> Handling of ocular specimen, basic principles and procedures for tissue processing will be described. Histopathology and prognosis of common ocular conditions and primary tumors will be described. Correlation of clinical and pathologic findings will be discussed.
11.00am-2.00pm	<b>J. RIZZO Neuro-Ophthalmology</b> Symptom-driven approaches to patients with common neuro-ophthalmic complaints in order to formulate an appropriate differential diagnosis will be described. The most appropriate tests and imaging, based upon symptomatology will be discussed. Management of neuro-ophthalmic disorders will be discussed. Pathophysiology and management of eye movement disorders and diplopia will be described.	<b>J. SUGAR Cornea</b> The pathogenesis, clinical manifestations and treatments of herpes keratitis will be described. The clinical picture, possible pathogenesis and treatment of keratoconus will be reviewed. The results and implications of the cornea donor study will be discussed.
2.30pm – 5.30pm	<b>D. D'AMICO Retina</b> Pathological processes that affect the retina and the vitreous will be described. Appropriate methods of examination and ancillary studies for the diagnosis of vitreoretinal disorders will be discussed. Data from major prospective clinical trials in the management of selected vitreoretinal disorders will be presented. Principles of medical and surgical treatment of vitreoretinal disorders will be discussed.	<b>K. WRIGHT Pediatric Ophthalmology</b> Evaluation techniques for young children that provide the maximum gain of information will be described. The classification, diagnosis, and current concepts in treatment options for amblyopia, strabismus and nystagmus will be discussed. The most common diseases and malformations of the corneas, lacrimal drainage system, anterior segment, and iris seen in children will be described.
