

BEGINNING WEB AUTHORIZING WITH DREAMWEAVER

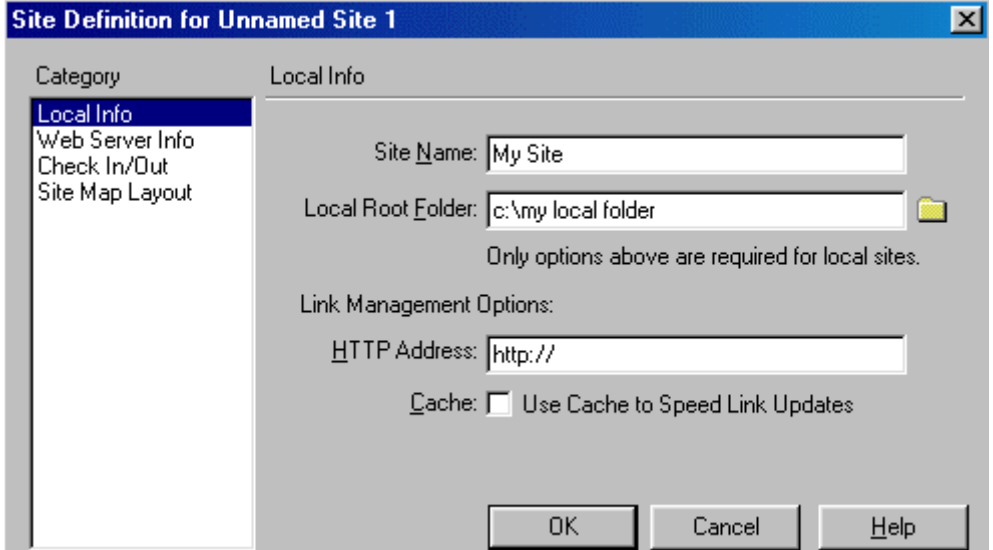

SITE FILES

<http://www.accc.uic.edu/seminars/dreamweaver>

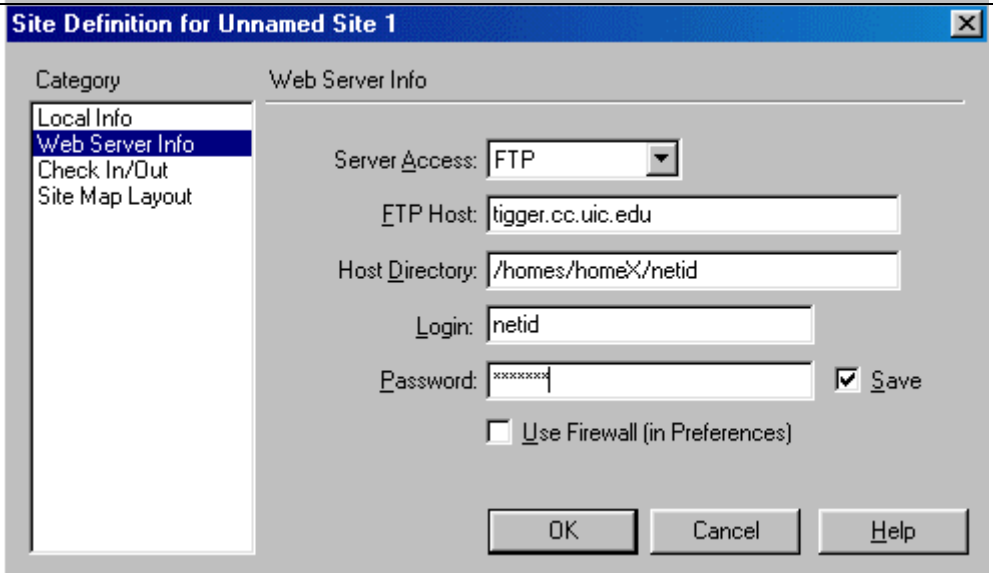

At The top of the Site Map, click on the drop-down arrow next to the name of the site and choose “Define Sites.”

This is the setup for your Local Information. Give your new site a name and indicate the root folder on your computer.

This is how to set up the Web Server Info for your **personal site**. Please note you must choose between **icarus.cc.uic.edu** and **tigger.cc.uic.edu**. For the Host Directory, you can fill in the Host Directory as shown, or simply type **public_html**. Note the **X** under Host Directory refers to a number in which your personal folder is stored. You can figure this out by logging on to icarus or tigger and typing the command **pwd**.

BEGINNING WEB AUTHORIZING WITH DREAMWEAVER

SITE FILES

This is how to set up the Web Server Info for a **department site**. You must know the name of the folder for your particular department. You can obtain this (or have one created) by emailing www@uic.edu.

The screenshot shows the 'Site Definition for Unnamed Site 1' dialog box. The 'Category' list on the left includes 'Local Info', 'Web Server Info' (selected), 'Check In/Out', and 'Site Map Layout'. The 'Web Server Info' section contains the following fields: 'Server Access' is set to 'FTP'; 'FTP Host' is 'tigger.cc.uic.edu'; 'Host Directory' is '/usr/local/etc/httpd/htdocs/depts/XXXX' with a mouse cursor over the 'X' characters; 'Login' is 'netid'; 'Password' is masked with asterisks; there is a checked 'Save' checkbox and an unchecked 'Use Firewall (in Preferences)' checkbox. At the bottom are 'OK', 'Cancel', and 'Help' buttons.

This is how to set up the Web Server Info for a **class site**. Note that the **X** under the Host Directory refers to the type of class (Accounting, English, Math, etc.), while the **Y** refers to the specific class rubric (actg110, eng1201, math315, etc.). You can obtain this (or have one created) by emailing www@uic.edu.

The screenshot shows the 'Site Definition for Unnamed Site 1' dialog box. The 'Category' list on the left includes 'Local Info', 'Web Server Info' (selected), 'Check In/Out', and 'Site Map Layout'. The 'Web Server Info' section contains the following fields: 'Server Access' is set to 'FTP'; 'FTP Host' is 'tigger.cc.uic.edu'; 'Host Directory' is '/usr/local/etc/httpd/htdocs/classes/X/Y'; 'Login' and 'Password' fields are empty; there is an unchecked 'Save' checkbox and an unchecked 'Use Firewall (in Preferences)' checkbox. At the bottom are 'OK', 'Cancel', and 'Help' buttons.
