

Parthenium integrifolium

WILD QUININE AMERICAN FEVERFEW (Composite Family)

in the **Peacock Prairie** at the **James Woodworth Prairie Preserve**

Small heads (1/4" wide) with 5 tiny, white rays widely spaced around the margin. Heads numerous, in a large, branched cluster. Basal leaves elliptical or egg-shaped, long-stalked, rough-surfaced, and up to 12" long. 1-4' (31-122 cm) high. Blooms at the James Woodworth Prairie Preserve from about the 2nd in June through the 4th week in August.
