Dear EXPO Participants,

Welcome to PHASE II of EXPO Registration!!

By now you should be developing a written project description called an Abstract. This abstract must be submitted by Friday, March 6th for it to be included in the EXPO Program booklet.

You may submit your abstract early, and not wait for the last day/deadline. Also, be sure to have your Senior Design Instructor/Advisor proofread it.

EVERYONE, be sure to review the EXPO Information Session powerpoint and sample abstract, now at the website:

<http://www.engr.uic.edu/expo/>

a direct link for project submittal is at:

<http://www.engr.uic.edu/expo/Phase2.htm>

Time will go by quickly! See your faculty project advisor for questions on your abstract. Also, please know that this abstract will be the first introduction of your project to the Judges. They read and discuss it before they judge at your table. BE AWARE: If you change your project AFTER your abstract is submitted, the judges will not have an accurate description to follow and this may affect your score.

We wish you the best,

Chris Kuypers, EXPO General Chair

Dr. Houshang Darabi, Faculty Chair
