Patient Barcode

Attending Physician
NICOLE ALEXANDER, MD

DATE
&
HOUR

- ABG
- O₂ SAT
- Titrate O₂ to maintain O₂ SAT at 90% or greater.
- Electrolytes
- Cardiac Enzymes, Troponins
- CBC or Blood Count
 - Draw extra blood for potential future labs.
- If symptoms suggestive of stroke, rule out hypoglycemia by obtaining STAT Acu-check. Then perform NIH Stroke Scale and consider initiating the In-Hospital Code Stroke protocol.

NURSE TO:

1. Nurse to respond within 5 minutes of page.
2. Complete head to toe advanced assessment with bedside nurse and respiratory care — order tests as needed from protocol.
3. Notify attending physician of findings and obtain any further orders.
4. Notify hospitalist at the request of the attending or if attending physician cannot respond in a timely manner.
5. ICU nurse to enter note in patient's progress note of assessment findings and action taken.
