

Transfer Policies

Does anyone have a transfer policy for hemorrhagic strokes, or a Generic one, they would be willing to share? Our community hospitals do not have Neurosurgical coverage and we do not currently have a transfer policy in place for these types of patients to meet the JC DSC requirement. Any help is greatly appreciated.

Response #1 CMC provides neurosurgical services to other facilities by accepting patients transferred to under the institutions "Patient Transferred Agreement" contract. I suggest hospital check into existing transfer agreements and amending current contracts to include the neurosurgical services if needed?

Several additional actual transfer policies were shared; however, they are too large to list here. If you would like copies of the actual transfer policies, please contact hedworth@uic.edu.
