

## Great Lakes Regional Stroke Network

The Great Lakes Regional Stroke Network offers a listserv for members free of charge. This communication tool allows members to post questions and receive responses from other healthcare professionals throughout the Great Lakes region. Questions that have recently been posted range from “What are you using to document stroke specific competency for nurses, upon hire and/or annually?” to “Are there any specific strategies that Primary Stroke Centers without neurosurgery coverage have used to meet the standard for transferring to another facility with neurosurgery coverage within 2 hours?”

In addition to asking questions, listserv members receive the monthly GLRSN newsletter, *The Wave*, stroke guidelines and updates, and other GLRSN tools such as the Regional Burden Report and the Rehabilitation Inventory Report.
