HR Front End Rollout Training Update

During the last two months, over 330 users have attended the two-day training sessions offered by the HR Front End project team. The last scheduled session will take place the second week in June. When training is complete, a little over 400 users will be ready to use the new system. College representatives have determined which users required training on the new system. If you have attended the training and would like to refresh your training, the online courses, you have already taken, are still available online <http://www.uihr.uillinois.edu/tip/frontendtraining.cfm>.

The HR Front End project team also has more detailed How-To Guides available online <https://www.hrfe.uillinois.edu/documentation-tutorials>.

If you are uncertain if you should receive training for the HR Front End, please contact your college HR representative. For additional information on support labs or links to resources for all HR Systems used at the UIC campus, please check out the HR website at <http://www.uic.edu/depts/hr/support>.
