

Obesity Research Roundtable

**Thursday April 10
2:00 p.m. to 4:00 p.m.
Chicago Room C, Stu-
dent Center West, 828 S.
Wolcott**

Featured panelists:

Dr. Theodore Mazzone

Director, Center for Clinical and Translational Science; Professor of Medicine and Chief, Endocrinology
"Overview of the UIC CCTS--
Bridging basic, physiologic
and community research"

Dr. Terry Unterman

Professor of Medicine, Endocrinology, Diabetes, and Metabolism

"NIH T32 Training Grant in
Obesity and Diabetes Re-
search"

Are you currently doing obesity-related research? Interested in bridging the divides between basic and applied science and forming new collaborations? Curious about what others are doing? Seeking new funding? Then this event may be for you.

The Office of the Vice Chancellor for Research, Research Development Services in partnership with the Institute for Health Research and Policy and the Center for Clinical and Translational Science are pleased to announce the following research roundtable:

This roundtable features presentations from two distinguished UIC researchers followed by a structured question and answer period. The second hour will offer moderated break out sessions focused on specific funding opportunities, development of targeted working groups, or other areas of common obesity research interest. Topics will be determined in advance based upon suggestions from those registered for this event.

This forum is an opportunity for researchers to get to know each other, learn about each other's work, and set the stage for future conversations. Researchers from ALL obesity related areas (basic or applied, prevention, disparities, diabetes, translational research, bariatric surgery, etc.) are strongly encouraged to attend. Healthy refreshments will be served.
