

Posters (less than 48" h x 64" w) should be put up between 8 and 9:15 am Thursday February 21, 2008, on the second floor of the Student Union West. I attach a file indicating the poster number(s) for your presentations, including competition categories. The category assignments are based on our best information; let us know if any categorizations are incorrect. There will be a sign-in table where you can pick up an abstract book, a name tag, and where presenting M2s can sign in to excuse ECM working group attendance. Posters should remain up all day if possible, but grading will be either in the morning or the afternoon, in sessions as below.

Most posters will be mounted on standard poster board stands, with push pins (~10 provided). Because of the overwhelming number of submissions (208 this year, vs. only 48 last year), about 10% of your posters will instead be mounted on the Hall walls with masking tape (provided). Our apologies. If this absolutely will not work for your poster, let us know and we will try to accommodate.

**Poster Session I: 9:30 - 12:30.** This session will be for presentations by Graduate Students (posters 1 - 70) and Staff (posters 157 - 201)

**Poster Session II: 1:00 - 4:00 pm.** This session will be for presentations by Medical Students (Posters 71-88 and 208) and Postdocs (posters 99 - 156).

**THOSE WHO HAVE MORE THAN ONE POSTER ENTERED WILL ONLY BE ALLOWED TO MAKE 1 PRESENTATION OF 1 POSTER (THEIR CHOICE) FOR THE AWARD COMPETITION.**

Presenters will need to be at their poster boards during the session for which they are scheduled until the group of judges has heard their presentation (only 1 presentation will be made). It will be their responsibility to monitor the progress of the judges so they are present when the judges arrive - it would be impossible to schedule individual times for each presentation.

**PRESENTERS WILL HAVE 5 MINUTES TO PRESENT THEIR POSTER TO THE JUDGES.** Judges may ask questions at their discretion. Timing is critical and their score will be reduced for going significantly overtime unless it was due to the judges' questioning. The overall score will be determined by:

**Quality of the Oral presentation (40%)** - Did the presenter clearly and effectively communicate the background, methods, results and conclusions of the study?

**Quality of the Poster (20%)** - Are the data presented clearly? Do the figures convey the essence of the results? Are they legible? Is the poster laid out logically and is it easy to follow?

**Scientific Quality (30%):** Is the experimental approach sound and scientifically valid? Do the experiments appropriately test the hypothesis? Are the data of

good quality and are they interpreted correctly? Were appropriate controls done? Are the results significant? Are the conclusions adequately supported by the data?

**Use of time (10%):** Did the student adhere to the overall time limit? Was there an appropriate distribution between background, results, discussion? Was there time for questions?
