

## **Exhibit Information**

May 12, 2011 at the Hilton-Lisle in Naperville, Illinois

The UIC e-Government Workshop brings together the best and the brightest in public service and information technology. Over 100 diverse stakeholders from 50 communities across the region, including representatives from government, business and education come together – committed to sharing government technology solutions for operating in today's fiscal environment.

The third annual workshop will highlight ways that government agencies can achieve economies in the use of information technology by collaborating with both the private and public sectors through the use of cloud computing and other shared services arrangements.

The Workshop is the only of its kind in the United States offering an opportunity for local governments to learn strategies and best practices to increase engagement of their citizens with government through technology. The Workshop is a one-day event composed of panel discussions, interactive workshops, and stimulating keynote speakers. Attendees are encouraged to network with exhibitors and peers before the Workshop begins, during breaks, lunch and after the workshop.

If you are looking for a more personal environment to showcase your products and services, the e-Government Workshop is the place for you! Exhibit at the Workshop and network with Mayors, City/Village Managers, Engineers, Directors of Finance, IT Specialists, GIS Managers and many more.
