Dear Friend of SAPRP,

I was privileged to attend the recent Substance Abuse Policy Research Sustainability Coalition Meeting in Washington, D.C., where the main item on the discussion agenda was how to sustain research on policies that affect drug, alcohol, and tobacco use and treatment. Supporting the continued development of policy research is also a goal of the Division of Epidemiology and Prevention Research, National Institute on Alcohol Abuse and Alcoholism (NIAAA).

In that regard, I invite you to consider three program announcements NIAAA has recently issued. These three, all similar in content, have been developed for the R01, R03, and R21 grant mechanisms. They each carry the title "Research on Alcohol-Related Policies such as Those Detailed in the Alcohol Policy Information System" and can be found at the following addresses:

<http://grants.nih.gov/grants/guide/pa-files/PA-07-427.html> (R01 version)

<http://grants.nih.gov/grants/guide/pa-files/PA-07-429.html> (R03 version)

<http://grants.nih.gov/grants/guide/pa-files/PA-07-428.html> (R21 version)

I hope that those of you who are interested in studying the effects of alcohol-related public policies on health, economic, and social outcomes will find an opportunity in these announcements to compete for future research funding.

Best wishes in the continued development of your research career.

Mike Hilton, Ph.D.
Associate Director, Division of Epidemiology
and Prevention Research
National Institute on Alcohol Abuse
and Alcoholism
