

Grantsmanship 101: How to Write an Effective Grant Application

College of Medicine Research Building
909 S. Wolcott, 6th floor
Conference Room 6175
12:00 -1:30 pm
Tuesday May 13, 2008

Lessons learned

At the end of the lecture, you should:

- Have learned how to craft a potentially successful application for federal or private funds.
 - Understand the basic elements of a grant application.
 - Understand the peer review process.

William T. Beck, PhD, *Professor of Pharmacology and Molecular Genetics and Department Head of Biopharmaceutical Sciences, Associate Dean for Research and Graduate Education, College of Pharmacy.* Dr. Beck has served on many NIH, DOD, ACS and other grant review panels for agencies in the US, United Kingdom, Italy, Hong Kong, and Holland, among others. He also recently served for three years as co-chair of the Grant Writing Workshop of the American Association for Cancer Research. Dr. Beck's laboratory focuses on the molecular and genetic bases of tumor cell resistance to anticancer drugs, pharmacologic means to circumvent such resistance, splicing factors as novel therapeutic targets, and a translational emphasis to detect and circumvent drug resistance mechanisms in tumors. Dr. Beck's work has a translational goal of applying laboratory findings to the clinic.

Co-sponsored by:

The Center for Clinical and Translational Science (CTS), Institute for Health Research and Policy (IHRP)
and the Clinical Research Training Program (CRTP)
