

# Annual Report

## Fiscal Year 2009

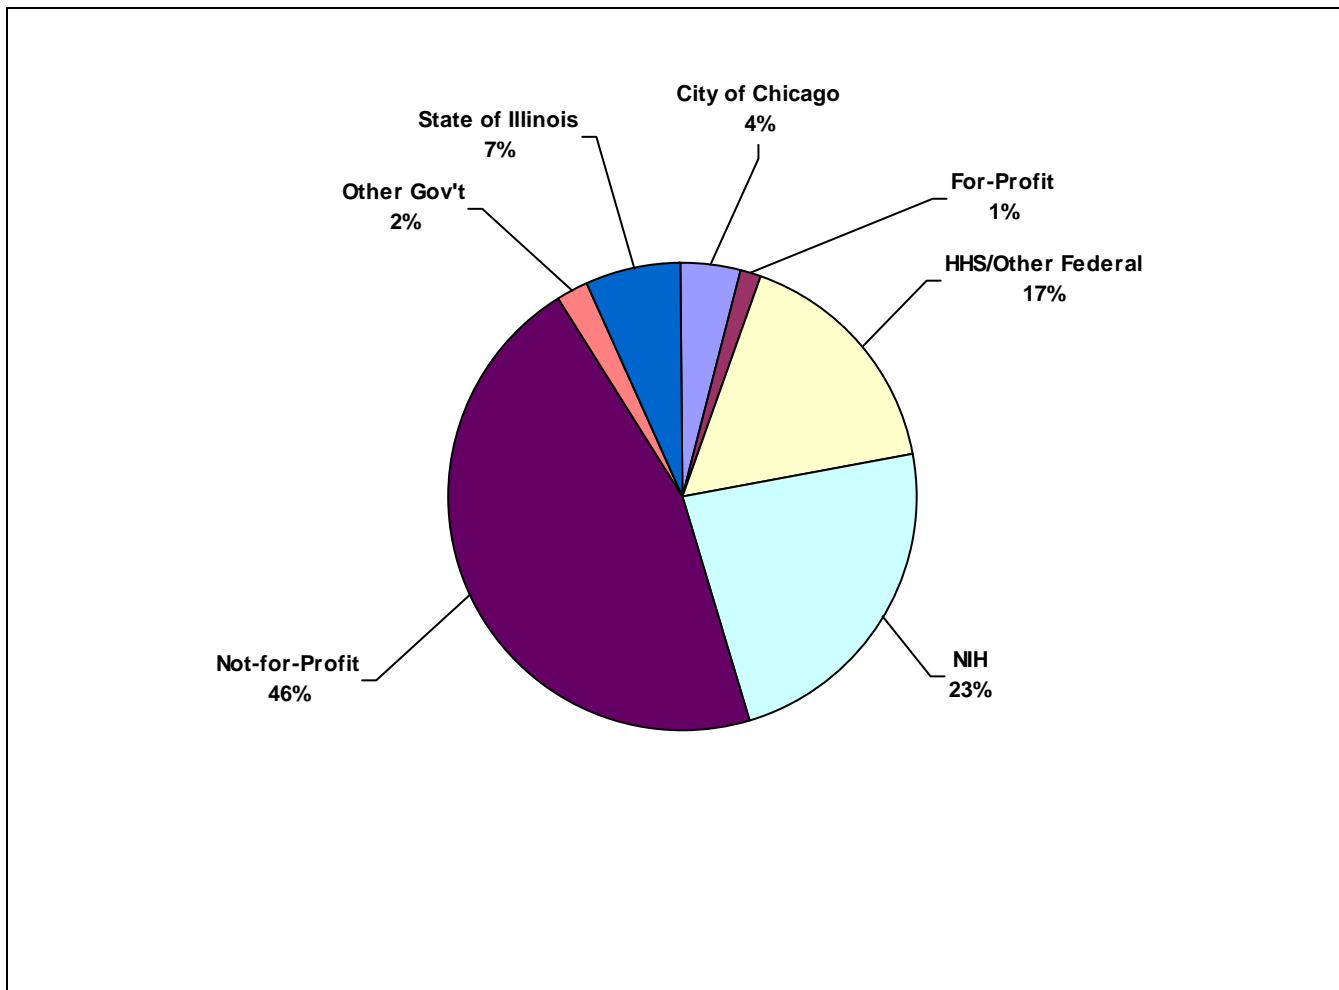

## Summary of ORS Annual Report

SPH faculty continue to be very productive in generating over 200 external applications per year. Our success rate for all external applications is 37% a proportion that has declined by 20 percent in the last four years. The majority of our applications (40%) are submitted to NIH and other HHS agencies, for which our success rate is 16% and 37% respectively. These rates are quite positive given the current research funding climate. A large proportion of applications (45%) are submitted to a wide variety of non-profit organizations with an overall success rate of 37%, which includes Robert Wood Johnson Foundation, Chicago Community Trust, and AIDS Foundation of Chicago. The details of the 2008-2009 SPH preaward activities by unit are outlined in the figures and charts. Trend data from 2006-2009 are included. In evaluating these trend data one must recognize that an application submitted in 2009 has had fewer months to be evaluated and funded than an application from 2006. Comparing success rates at the same point each year for 09,08,07,06 the success rates were 37%,37%, 52% and 57%, respectively. This suggests that our success rate dropped in 2007 but has been holding the last two years.
